

IN THE CLAIMS

Please cancel Claims 1, 2, 13 and 14 without prejudice to or disclaimer of the subject matter recited therein.

1-2. (Canceled)

3. (Previously Presented) A digital camera which can directly communicate with a printer, comprising:

a receiving unit that receives capability information of the printer from the printer;

a determination unit that (a) determines, according to the received capability information, whether the printer has a first function of automatically detecting a paper size, and (b) determines, according to the received capability information, whether the printer has a second function of automatically detecting a paper type; and

a user interface that notifies a user that the printer has the first and second functions if said determination unit determines that the printer has the first and second functions.

4-14. (Canceled)

15. (Previously Presented) The digital camera according to claim 3, wherein said user interface inhibits a user from selecting a paper size if said determination unit determines that the printer has the first function.

16. (Previously Presented) The digital camera according to claim 3, wherein said user interface inhibits a user from selecting a paper type if said determination unit determines that the printer has the second function.

17. (Previously Presented) The digital camera according to claim 3, wherein said user interface (a) inhibits a user from selecting a paper size if said determination unit determines that the printer has the first function and (b) inhibits a user from selecting a paper type if said determination unit determines that the printer has the second function.
